Fashion and Functionality Meet in Smart Jewelry

By GREGORY SCHMIDT OCT. 8, 2014

Fashion designers have turned much of their attention to wearable tech options for women, but Dalys 1895 puts the focus on men. The company, an online purveyor of high-quality men's accessories, has introduced a pair of sterling silver cuff links with a 16-gigabyte USB drive inside. The cuff links can be personalized with a monogram, and Dalys offers limited-edition, hand-engraved edges for an extra \$50.
